

Blood Transfusion Request Forms (ORC)

Obscuring the information on the blood transfusion request form causes delays to blood transfusion testing and the release of blood and blood components.

Please ensure that the request form, when folded into the specimen bag, allows the blood transfusion laboratory team to quickly and easily identify URGENT or ROUTINE REQUESTS

Before sending to the laboratory check the patient details remain visible, test requirements are clear and that the form has been signed.

For additional information on blood transfusion sample labelling please refer to the Trust Transfusion Policy or contact the ORC blood transfusion laboratory: Tel. 64400
