RECRUITMENT OPEN DAY

Do you want to join a Gold award winning team?

CTCCU

CTCCU is the specialist centre for lifesaving heart and lung transplant operations covering the whole of the North West of England - serving a population of over 6.5 million in five major cities. We are one of only 5 heart transplant centres in the UK. Our staff are caring, highly trained and experienced at looking after some of the most critically ill patients in the country.

The Cardiothoracic Critical Care Unit is a 31 bedded state-of-the-art intensive care unit where we care for those patients who have had Cardiothoracic surgery, heart and lung transplantation and those patients that need advanced support for severe heart and lung failure, as well as patients who have suffered chest trauma or out of hospital cardiac arrest.

ECMO TEAM

The unit is an Extracorporeal Membrane Oxygenation (ECMO) centre which treats adults across the North West, North of England and the North East for potentially severe respiratory failure due to a range of conditions including Asthma, Pneumonia and ARDS following Trauma and Burns injuries. We collaborate with some of the world's most experienced hospitals in using ECMO.

CCAT TEAM

The Cardiac Recovery Unit on CTCCU, a six bedded zone utilised to care for post-operative cardiac patients immediately following their surgery. We aim to expedite extubation, chest drain removal, mobilisation and consequently discharging our patients to the ward, so enhancing their recovery.

EDUCATION

All new staff take part in the unit-organised induction program which is supported by our Practice Based Educator team, and newly qualified nurses also access the Trust Preceptorship Program. New staff on the unit are supported by a team of Practice Trainers whose key focus is to support nurses in clinical practice and also have access to specialist education days.

CTCCU is part of the Manchester Critical Care network and our nurses are able to apply for the accredited Intensive Care Course affiliated to the Critical Skills Institute and Manchester Metropolitan University after 12 months on the unit.

DATE OF OPEN DAY: Saturday 25th January 2020 10.00 - 14.00
