

Information for Patients

How to fit a Bangerter Foil

What is a Bangerter foil?

Bangerter foils are graded thin flexible patches of varying degrees of transparency that help restore stable, single vision.

Purchasing a Bangerter foil

Following discharge from the Eye Hospital you still require a Bangerter foil.

A new Bangerter foil can be purchased over the internet. Search for “**Purchasing a Bangerter foil**”.

You require a _____ strength Bangerter foil.

Fit the Bangerter foil onto the inside of the lens.

Your Bangerter foil needs to be fitted onto the _____ lens.

Fitting your Bangerter foil

When your Bangerter foil arrives, it will come in a packet (see below). Please follow the instructions on the packet when fitting your Bangerter foil.

Foil strength

0.0 LP <0.1 ~0.1 ~0.2 ~0.3 ~0.4 ~**0.6** ~0.8 ~1.0

OCCLUSION

n. Bangerter

Montage:

1. Occlusiv-Folie auf Glasform 1mm kleiner zuschneiden.
2. Glanzseite der Folie und Brillenglas reinigen, entfetten.
3. Folie auf ganz nasse Innenseite des Glases andrücken, trocknen bis keine Luftblase mehr sichtbar ist.
4. Der gewünschte Occlusionsgrad ist frühestens 1h später erreicht.

Fitting:

1. Cut the foil to the shape of the lens 1mm smaller.
2. Clean and degrease the lens and the shiny side of the foil.
3. Place the foil on the wet inner side of the lens, press on it and let it dry until you can see no air bubbles.
4. Leave for at least one hour to achieve the desired degree of occlusion.
