

The University Dental Hospital of Manchester

Cone Beam CT Service

The University Dental Hospital is pleased to announce that it is now providing a Cone Beam CT service for dentists in general practice* and other NHS Trusts who would like to refer patients for Cone Beam CT scans.

The Radiology Department can provide:

- All scans carried out on our low dose Morita Accuitomo 170 CBCT, for a range of clinical applications*
- All scans carried out by specialist radiographers led by consultants in Dental and Maxillofacial Radiology
- Consultant radiological clinical evaluation and report provided of all the scanned volume, in line with IR(ME)R requirements
- Full range of scanning areas offered from 4cm to 18cm volume
- Images presented on disc with included viewing software, or as DICOM files for import¹ into implant planning software (e.g. SimPlant; Nobel, etc)
- Competitive price

To obtain further information about the service please contact the Radiology Department on **0161 275 6692**

The Radiology department will be working within the Referral Criteria set out in the European Guidelines for Cone Beam CT scanning which can be viewed on:

www.sedentexct.eu/guidelines

email: dentalradiology@cmft.nhs.uk

1DICOM files provided, but transfer into alternative viewing software is not provided by us as a service at present

**Private charges apply for this service.*
