PATIENT INFORMATION LEAFLET

REVIEWING YOUR CERVICAL SCREENING HISTORY

CERVICAL CANCER AUDIT

You have recently been diagnosed with cervical cancer and have either completed treatment or will shortly be due to receive treatment. This leaflet is to ensure that you are aware that there will be a review of your cervical screening history up to the point when your cervical cancer was diagnosed.

This will include a review of:

- All of your previous cervical screening
- Colposcopy referrals and appointments
- Any biopsies and treatment reports
- Follow up arrangement plans

WHY DO YOU NEED TO AUDIT MY RECORDS?

This review will not in any way affect the care you will receive from your doctors. All the information collected in the audit is confidential and the analysis of the national audit data will be undertaken on an anonymous basis. All cases of cervical cancer will be reviewed.

The National Cervical Screening Programme is estimated to save around 4,500 lives each year in England and to prevent about 3,000 cancers each year in the U.K. Regular screening is the best way to detect early changes to the cervix, however, screening cannot identify every single case of cancer or pre-cancer. This is for a number of reasons which are related to the screening test that is in use and the different forms of treatment that are given.

THIS AUDIT WILL HELP US IDENTIFY:

Areas where the screening programme is working well as well as any areas for improvement.

THIS AUDIT MAY ALSO HELP:

Improve the organisation of the screening programme and provide a better understanding of the development of cancers and how they are diagnosed.

The results of your review should be available in a few months' time. Please let us know if you would like to receive the results of the review of your screening history when it is available. If you wish to receive the findings, you will be offered an appointment with a consultant to discuss the results and ask any questions you may have. If you would prefer to receive your results in writing this could be considered upon request.

If there is anything that you do not understand about this review or if you would like to discuss it in more detail, please let us know and we can arrange an appointment for this. You may also wish to discuss this with your close family and friends, General Practitioner or nurse specialist.

FREQUENTLY ASKED QUESTIONS

WHAT DOES THE REVIEW INVOLVE?

We review all records connected to the letters inviting you to come for screening, cervical screening tests, result letters and any previous medical investigation related to cervical screening. A group of professionals then look again at your previous tests, your medical notes related to cervical screening and also examine whether your screening history meets national guidance.

WHAT MIGHT THE REVIEW SHOW?

In most cases, the audit will show that the correct procedures have been followed and that you received appropriate care. Sometimes, the review may find that one or more steps in the process have not worked as well as they should and may highlight where we could make improvements.

WILL I BE ABLE TO HAVE ACCESS TO THE RESULTS OF MY SCREENING AUDIT?

If you want to know the results of the review, contact the colposcopy department. Your doctors will let you know when the outcome is available and arrange to discuss the results with you.

WHAT IF I DO NOT WANT TO KNOW THE RESULTS OF MY SCREENING AUDIT?

It is completely up to you to decide whether or not you want to know the results of the review. Please be reassured that your decision will not affect your care.

WHAT IF I DO NOT WANT TO KNOW THE RESULTS OF MY SCREENING AUDIT BUT CHANGE MY MIND LATER?

We understand this is a difficult time and you may not want to receive the results of the review now. If you decide that you do want to know the results in the future, please contact the colposcopy department and the secretary will arrange an appointment where you can discuss the results.

CAN MY FAMILY ASK FOR THE RESULTS IF I DO NOT WANT TO KNOW?

We cannot give your relatives access to any details, unless you give permission.

COULD MY CANCER HAVE BEEN FOUND EARLIER?

In many cases the cancer will have been detected at the earliest possible stage. Although cervical screening prevents a high percentage of cervical cancers (about 75%), it cannot prevent them all.

The review process aims to highlight any possible areas of weakness so we can make improvements for everyone. Some examples are given below.

Screening cannot always identify abnormal cells on a cervical-sample slide because:

- Sometimes the cells do not look much different from normal cells
- There may be very few abnormal cells on the slide
- The person reading the slide may miss the abnormality (this happens occasionally, no matter how experienced the reader is)

A visual examination of the cervix cannot always identify abnormal areas because:

- The abnormal areas might not be visible during the examination
- The abnormal areas might not be taken as a sample in biopsy
- The abnormal cells might be hidden higher up in the cervix
- Some types of abnormality are simply not easy to identify at a Colposcopy

WHAT HAPPENS TO THE INFORMATION COLLECTED FOR MY REVIEW?

We collect screening information as part of an ongoing process. Your information (without your name) goes towards improving the systems of the programme and to help discover more about how cancers develop and how they are diagnosed and treated. This is done whether or not you want to know the results of the review.

If you require any further information or clarification of terminology, please do not hesitate to talk to one of the doctors or nurses, who will be happy to discuss your concerns with you.

CONTACT DETAILS

SAINT MARY'S HOSPITAL, OXFORD ROAD:

To cancel/change appointments or to enquire about your results contact:
(0161) 701 4455 (option 5) Secretaries (08:30 – 17:00)

For non-urgent clinical advice within hours, please contact the Nurse Colposcopists located at Saint Mary's Hospital, Oxford Road
