Making Semen Analysis Requests and Appointments on ICE.

All requests for semen analysis should be made electronically by the requesting Doctor using the lab requesting system (ICE). The laboratory will automatically be informed of the request and we will contact the patient to arrange an appointment. Please ensure patient contact details are up to date.

If the patient is given a copy of the request or request labels, they should bring them to the appointment.

If a patient has not received an appointment within 10 working days of the request being made then they should contact us at mft.andrology.lab@nhs.net .

Can samples be passed at home?

Yes, but an electronic request must be made, and an appointment is required to drop the sample at the laboratory within **one hour of passing the sample**. Some GP surgeries have our semen analysis packs. If not, patients can arrange to collect one from us (once the test has been ordered) by emailing mft.andrology.lab@nhs.net .

If you have any questions, please email mft.andrology.lab@nhs.net
